PROJECTS

Online shopping Website:

- This is a broad category where you can see a variety of clothing items for men, women, and children.
- Clothing: the website focuses exclusively on men's clothing,women'sclothing,kid'sclothing etc.
- Implemented dynamic product filtration and navigation using React Router dom for seamless browsing and login/register functionality and responsive cart system.

Count downtimer

- A countdown timer is a virtual clock where we have to set the end time.
- I created this project by using Javascript.In this project i used methods like setInterval() ,clearinterval() and newdate this are methods i used to complete.

INTERESTS

Playing chess | Listening Music

DECLARATION

I here by declare that all the information given above is true and correct to the best of my knowlwdge
